S&P Dow Jones Indices show average price gains for Miami

The S&P Dow Jones Indices recently released the S&P/Case-Shiller Home Price Indices, showing continued growth in home prices over the last 12 months. The report showed that U.S. home prices have improved 5 percent year-over-year in April. Although national growth didn't quite reach March's 5.1 percent gain, the steady year-over-year increase is supported by six consecutive months of a growth rate of 5 percent or more. Graph courtesy of S&P/ Dow Jones The S&P/Case-Shiller Home Price Indices showed Miami's average home price to be $211,180 in April. This is 1.1 percent growth over March following the same growth from the month before. The report also includes the price differences as it relates to seasonally adjusted (SA) and non-seasonally adjusted (NSA) da...
